
In-class Practice – **Counter1ConstructorStatic**

Copy **Counter1Constructor.java** to **Counter1ConstructorStatic.java**.

- Add code and the necessary variable so that the **Counter1ConstructorStatic** class keeps track of the number of **Counter1ConstructorStatic** objects created.
- Create a static method called **getNumCounters** that returns the number of **Counter1ConstructorStatic** objects that have been created.

Included with this assignment is **Counter1ConstructorStaticTester.java** that you can use to test your program.

What output do you expect when you run the program?

After you feel your program is correct, further test your program, by obtaining **Counter1ConstructorStaticGrade.java** from this assignment. Run **Counter1ConstructorStaticGrade** to view your score.

When your program works correctly, submit **Counter1ConstructorStatic.java**.
